

LIBERTY'S GUIDE TO PROTECTING YOUR RIGHTS ONLINE

The Investigatory Powers Act is now law, allowing the Government to record and monitor everything you do online – all without any suspicion of wrongdoing.

Here are some simple tips you can use to protect your communications from State surveillance:

1. BROWSING THE WEB – DOWNLOAD TOR TO BROWSE ANONYMOUSLY

Internet Service Providers won't be able to record or see which websites you visit using the Tor browser.

2. CALLS AND MESSAGING – USE THE SIGNAL APP TO ENCRYPT CALLS AND INSTANT MESSAGES

Similar to WhatsApp – but won't share your data with Facebook.

3. EMAILS – ATTEND A CRYPTOPARTY AND LEARN ABOUT EMAIL ENCRYPTION

Keep an eye on www.liberty-human-rights.org.uk/support-us/whats for upcoming privacy events.

4. JOIN LIBERTY – WATCHING THEM WATCHING US

Our message to the Government about mass surveillance? See you in court. Join us to support our legal challenge.

The Investigatory Powers Act protects neither our security nor our privacy. But this is by no means the end of the road. We'll be challenging the Snoopers' Charter in the courts and continuing to help you protect your rights.
